

The SAT

Paper

VS

Digital

3 Hours

2 hours 14 minutes

Calculator **prohibited on the first math** section

Calculator is **allowed** on the **entire test**

Format: Reading, Writing, Math (No Calc), Math (Calc)

Format: Verbal 1, Verbal 2, Math 1, Math 2

Reading has **5 long passages** with 10-11 questions each

Short passages with 1-2 questions each

Test **does not adapt** based on student performance

Test adapts based on student performance

Questions are **not weighted**

Questions **weighted by difficulty**

How does the Digital SAT adapt?

Module 1

Students are given questions of **mixed difficulty**, with the **more difficult questions being weighted more heavily**, or worth more points.

Student routed based on performance

Less Difficult Module 2

Students who do not answer as many difficult (or heavily weighted) questions correctly will be routed to a less difficult second module. Correct answers in this module are generally worth fewer points.

More Difficult Module 2

Students who answer more difficult (or more heavily weighted) questions correctly will be routed to a more difficult second module. Correct answers in this module are generally worth more points.

Least Difficult
Moderately Difficult
Most Difficult

WHAT THIS MEANS FOR YOUR SCORE

Students routed to the **more difficult module have access to questions that are worth more points**. This means that they can **get fewer questions correct, but still get a higher score** than a student routed to the less difficult module.

On the flip-side, students who are routed to the **less difficult module** are essentially **locked out of higher potential scores**.
